It is basicly alot of what if questions.

1 - If...

If you had two twidly links that multiply each minute... what would happen if you eat them....

If a bird dropped on your head and bit your nose for ruining its landing, would you be mad?

If turtles ruled the world... would the speed limit go down?

If I told you that writting this is a waste of time, would you laugh?

IT'S A WASTE OF TIME!!!!
