Professional firms use presentations to inform, educate and motivate the audience. They build presentations into sales, training and communication programs using the power of words and images to engage the audience. Presentation makes it easier to engage the audience and provides an opportunity to meet your customers in person. You can change content quickly and easily to incorporate new information or to modify a presentation for different audience. A presentation provides a framework for communicating information about product, services or companies in a structured way. You can use them in one-on-one meetings, viewing the content on the laptop or on tablet computer.

Today the new tool of the trade is fast becoming tablet. Tablets are becoming sales presentation tool serving as the modern salesperson new desktop. If you use iPad presentation in your business and want to make interesting and effective presentations StoryPad is the best solution for you.

StoryPad as a presentation application allows you to create presentations on iPad and maximise the field engagement with customers. With StoryPad you can easily set content into your device and change it or edit at any time. You can set global or local content towards single presenters, group or entire team. Since it is a cloud-based platform you can manage the entire campaign from anywhere and anytime.

It also allows you to gain feedbacks on which object the person has clicked, entire presentation duration or GPS prove on presented content. Key is also that with Storypad you can distinguish what the customers like and dislike and what slides they have seen. StoryPad was developed with many various industries who have the need to perform mobile presentation. If you have a big sales team this presentation application is the right choice for you.

Making a stunning presentation on iPad with StoryPad will prove to be very easy and quite affordable enabling digital presentations at a glance.
