*A list of pronunciations of the names of the characters and places for "Arasya." Please forgive me if the way I wrote the pronunciation doesn't make much sense, but this is my first pronunciation guide, so I gave examples of how the words sound.*

## GlossaryPronunciation Guide

There are so many character names and places in this story, that I thought that I should list them all here. Due to the spelling of most of the names and places, the pronunciation can be hard and therefore the name or place can be pronounced incorrectly. The names of the places are original but some of these names are from other languages, such as Latin and Old English, and the way the pronunciation is written may be incorrect; other names were suggested to me via the computer and therefore the way the pronunciation of the name is written may not be correct as well. I apologize if any of these names are mispronounced, but these are the ways I would like the names pronounced.
