Sometimes the burner valves don't close completely anymore, especially on older ranges, and gas seeps through slowly. It can also come from a loose connection where the line meets the cooktop. Since gas issues aren't something to DIY, calling someone who handles home appliance repair in Orange County, CA <https://akappliance repairca.com/> is the safest move.

Chapter 0 - Stove smells like gas when off 2

0 - Stove smells like gas when off

Even a mild gas smell around a stove is something to take seriously. Sometimes the burner valves don't close completely anymore, especially on older ranges, and gas seeps through slowly. It can also come from a loose connection where the line meets the cooktop. Since gas issues aren't something to DIY, calling someone who handles home appliance repair in Orange County, CA <https://akappliancerepairca.com/> is the safest move. AK Appliance Repair checked my range once and tightened a tiny fitting that was releasing gas so slowly I never would've found it myself. After that, the smell disappeared completely.
