## 0 - My experience learning on a demo account

[font=system-ui,]When I first became interested in trading, it was difficult to understand where to start. Especially when you hear terms like "forex broker" and don't even know how it all works. Then I installed the program I found here: [url=https://play.google.com/store/apps/details?id=com.roboforex.webtrader&hl=en]https://play.google.com/store/apps/details?id=com.roboforex.webtrader&hl=en[/url] and started with a demo account. It was a safe way for me to try out the market, see how the charts react, and learn how to open and close positions. It's very convenient that everything is intuitive and the interface is not overloaded. I practiced every day, and it gave me confidence before moving on to real trading. The app became a full-fledged learning tool for me.[/font]
